Profile Summary

Data-driven Business Strategy & Analytics Specialist with 4+ years of experience driving revenue, vertical growth, and monetization in high-growth e-commerce/marketplace environments. Proven track record owning category P&Ls, optimizing dynamic pricing models, analyzing platform traffic via Google Analytics and SQL, and collaborating with cross-functional product, finance, and engineering teams to execute high-impact commercial roadmaps.

Professional EXPERIENCE

AKL Auto feeding industries- A market leader automotive spare parts manufacturer in the MENA region since 1992.

Commercial analyst

Jun 2022 – Feb 2026

- Supported sales operations and commercial decision making by identifying high performing sales routes, customer segments, and product opportunities.
- Analyzed marketplace traffic and user behavior via Google Analytics and SQL, identifying key funnel drop-offs to improve conversion by 15%.
- Developed a real-time Power BI dashboard ecosystem to monitor monthly revenue and sales rep KPIs, reclaiming 40+ operational hours per month and accelerating executive decision-making cycles by 85%.
- Conducted sales forecasting and trend analysis using time series model and lifetimes model, achieving **95% forecasting accuracy** and improving inventory planning.
- Optimized 29+ regional sales routes using geospatial analysis and performance metrics, resulting in a 12% increase in sales force efficiency and a 15% expansion in client reach.
- Constructed a predictive churn model using XGBoost, achieving 78% accuracy in identifying at-risk B2B customers and providing a proactive retention framework that reduced churn by 20%.

PROJECTS

Market Basket analysis (Apriori) | Python

- Analyzed 10 million+ transaction records to uncover hidden product associations. Identified top-tier pairings with a Lift score > 2.0, enabling the commercial team to deploy targeted bundle offers that boosted Average Order Value (AOV) by 13%.

Customer Segmentation (K-Means clustering) | Python

- Architected a customer segmentation framework using RFM modeling. Validated 4 distinct customer personas through the Elbow method, facilitating a personalized marketing strategy that improved retention by 22%.

Sales Performance & tracking KPIs Dashboard | Power BI

- Built a dynamic dashboard showing monthly revenue, customer segments, and sales rep performance-reduced manual reporting by 85%.

Customer Lifetime Value Analysis (lifetimes) | Python

- Predicted long-term revenue streams by implementing BG/NBD and Gamma-Gamma models. Identified a 'High-Value' segment responsible for 80% of revenue, allowing for strategic reallocation of loyalty program resources.

Customer Churn prediction (XGBoost classification) | Python

- Developed a classification model (78% accuracy) to identify at-risk customers early, reducing churn by 20%.

Education & Certifications

Bachelor of Pharmacy, Mansoura University, 2019
Google Data analysis specialization - Coursera

SQL fundamentals' specialization, Data camp
Machine Learning Specialization - Andrew NG, Coursera
